

# Vent and Blowdown Silencers

## About SPL Control Inc.

Since 1976, SPL Control has been providing acoustical solutions to companies in the Oil and Gas and Power sectors. Our products have been engineered for clients in every continent around the globe. Backed by our in-house engineering capabilities and a strong commitment to client excellence, we design and deliver optimized, high-quality solutions for every project.

SPL Control Inc. 84 Shaver Street, Brantford, Ontario, Canada N35 0H4  
(519) 623-6100 [www.splcontrol.com](http://www.splcontrol.com)

Hard work, commitment and innovation is the heart and soul of SPL Control Inc. Through customized engineering, design optimization and manufacturing experience we are a leader in noise management solutions. We focus on delivering optimum performance and uncompromising reliability that you can trust now, and for the future.

## THE SPL CONTROL ADVANTAGE

We offer a full range of standard and custom-designed solutions, ensuring that we have a product to meet your project specific flow rate, noise reduction and back pressure requirements for:

- Gas transmission compressor station blowdowns
- Process vents
- Boiler blowdowns
- Safety and relief valve discharges

SPL supports new applications, as well as replacement of existing units, regardless of original manufacturer.

## WE NEVER COMPROMISE

Never compromising means using the best available materials and following rigorous QA processes to ensure that we maintain the highest quality deliverables.

Our insulation material is selected for harsh environments and tested for the exact properties needed to deliver optimal acoustic performance.

SPL's products are manufactured in state-of-the-art facilities under our ISO 9001:2015 program, ensuring that all project requirements are fully transferred into the final product.

## CONFIDENCE DELIVERED

SPL Control stands behind all their products, guaranteed.

Using our proprietary acoustical prediction techniques together with state-of-the-art digital process pipe flow simulation software, we provide optimized and proven solutions.

SPL's technical field assistance team supports our clients with early site assessments right through to installation assistance, providing industry leading customer service.

## LEADING VENT AND BLOWDOWN SILENCER SOLUTIONS

SPL Control is a proven leader in the design and manufacture of vent and blowdown silencers.

Our customers rely on SPL's 45+ years of experience in providing silencers backed by our deep engineering resources, long history of customer service, and ISO QA processes.

Talk to us about your next steam vent or natural gas blowdown silencer requirement and let us demonstrate what makes SPL Control an industry leader.
